

VESTA
MODULAR

Hurricane damage left a need for a quick luxury resort, VESTA utilized the Modular Building Solution

Modular is the New Luxury with VESTA

Oil Nut Bay Resort

Oil Nut Bay (ONB) Resort is one of the most prestigious resorts in the world. Positioned at the eastern most tip of Virgin Gorda, this location provides the sense of living and vacationing on a private island that is only accessible via boat or helicopter. The challenge presented to VESTA was to construct (4) private villas for the resort to rent out to future guests. Utilizing the VESTA modular building solution, a successful project was built and delivered in constructing the modules off site in one of our partner factories located in southern Georgia.

VESTA was hired to handle the design, engineering, manufacturing, transportation from factory to the port, installation of modules on site in factory, along with completion
