

Georgia Aquarium

Atlanta, Georgia

The Georgia Aquarium is currently undergoing a \$100 million dollar addition that is going to last at least three years. With this new addition, one of the immediate challenges they faced was figuring out where to put the displaced administrative staff including their Sales, Accounting, and Development personnel.

The aquarium purchased three 24' x 60' modular administrative office buildings from VESTA for the renovation which also includes 1,930 square feet of decking and covered canopies as well as the IT system and phone systems. The project also includes upgraded security.

Installation of decks and ramps underway
