

Social Circle, Georgia

Holder Construction was in need of a dining hall to serve 300 construction workers at the new multi-billion dollar Facebook facility outside of Atlanta, Georgia. Since this project will last five years, the customer needed a longer-term space solution that fit their budget. With a tight schedule due to the start of the Facebook project, VESTA Modular stepped up to provide the new dining hall by coordinating the building design, manufacture, delivery and installation. This nearly 8,700 square foot building was ready for use in only 60 days.
