

## Atlanta, Georgia

International Montessori Academy (IMA) in Atlanta, GA needed additional classroom space for their expanding enrollment. IMA already had students signed up to enter the new school in May of 2018. With only 90 days to add additional space by the start of school, a modular solution was the clear choice. VESTA Modular saw this project through from start to finish, beginning with design of the building up to installation on site. VESTA provided the required facility with time to spare, ensuring there were no disruptions to the school's students or faculty.
