

Modular Solution For Fire Station

Gainesville Fire Rescue

In order to accommodate the massive population growth occurring on the east side of the City of Gainesville known as Butler Plaza, the Gainesville Fire Department had to build a brand new Fire Station. Gainesville Fire Rescue found Whatley Law through one of his existing customers, Alachua County School Board.

GFR was in need of a permanent fire station that would blend in with the architectural review requirements of Butler Plaza. VESTA designed the building to fit the needs of the fire station, the community, and Butler Plaza Architectural Review Committee. The building was fully operational on September 5, 2017.
