

EXPANDING CHRISTIAN
SCHOOL LOOKING FOR A
BEAUTIFUL PERMANENT
BUILDING SOLUTION.

LINDISFARNE HALL – HOLY TRINITY ANGLICAN CHURCH

Lindisfarne Hall, a Christian & Classical School serving 3rd-12th grades located on Amelia Island in the quiet neighborhood of Fernandina Beach, Florida, needed a permanent building solution to meet the continued demand of increasing enrollment without impacting the residential surroundings. When time and cost were the biggest drivers, VESTA Modular, was called upon to design and build a quality, affordable, and architecturally appealing permanent modular building. One of the school's beliefs is that the child's surroundings should be beautiful, VESTA is proud to have been able to provide an attractive and cheerful setting for the students of Lindisfarne Hall to enjoy for the years to come.

VESTA was engaged at the project inception to play a lead role in designing the building and establishing the project budget while maximizing the efficiency and effectiveness of utilizing the modular building solution. Throughout the project, VESTA coordinated with the design and engineering team, City officials, and technical team to streamline and implement the first of its kind modular building located in Fernandina Beach, FL. As a licensed Florida General Contractor, VESTA handled the manufacturing, delivery and installation of the modules in addition to the various site scopes to successfully complete the building.

Project Details

Project Location: Fernandina Beach, Amelia Island, Florida
Building Type(s): Permanent Education Building
Module Count: 16
Total Sq. Ft.: 7,770 sq. ft.
Permanent or Temporary: Permanent
Days to Complete: 60
