GREEN DOT PUBLIC SCHOOLS PERMANENT CLASSROOMS

Green Dot Public Schools were looking to open up a third High School in the Memphis area for Grades 9 and 10. Our team was contacted to complete a permanent addition for Bluff City High School, in two phases. Since they wanted to open up Bluff City Charter High School in time for the start of the 2017 school year, they chose modular construction for their classroom space solution.

In 2017 [9] classrooms were installed for Phase I and then an additional [10] classrooms in 2018 for Phase II-at Bluff City High school. Both phases comprised of a total of 17,952 sq.ft with 22 modules, completed on time and on budget.

With enrollment continuing to grow, an additional [16] classrooms were installed during Phase III in 2019.

Phase I and II are connected buildings, while Phase III is connected with aluminum canopies and walkways for easy and efficient pass-through.
