

## Winkelman School

VESTA was contacted by West Northfield SD 31 in February 2018 to provide a proposal for a permanent space solution. Previously, they were accommodating expanding programs that required additional space to maintain small classroom sizes and wanted to add a FT Kindergarten, teacher workrooms, meeting space, and pre-school services provided by the regional Special Ed district.

Their goal was to add these facilities during the 2018 calendar year. A full brick exterior, approved by the local appearance commission, was installed on-site and the modular addition blends seamlessly with the existing school. VESTA provided a 9588 sq. foot, 10 module building with a convenient 12'x 64' modular connector, to allow direct access to the existing building.
