

## South Windsor Public Schools MODULAR CLASSROOMS

South Windsor Public Schools needed a modular supplier to provide classroom space due to increased enrollment. VESTA was able to utilize a cooperative purchasing agreement to supply South Windsor with the classroom space they needed and within a quick time frame. We provided them with an existing 4 classroom building that would fit their requirements as well as save even more time. The temporary building was finished with a connecting corridor from the main buildings as well as deck steps and ramps to finish.
