

CALCASIEU SCHOOLS TEMPORARY CLASSROOMS

Hurricane IDA caused significant damage to the Calcasieu Parish Schools creating a challenge for students to return to class. VESTA was able to step in helping provide over 100,000 square feet of temporary modular classroom and office space throughout the district. With a critical need, VESTA was able to quickly secure manufacturing line time and crews to help provide over 136 modules across 10 campuses throughout the Parish.
